### Skills

-  Python
-  Java
-  HTML
-  CSS
-  Javascript
-  TypeScript
-  TailwindCss

I am a software engineer driven by a love for problem-solving and crafting innovative solutions. With expertise in JavaScript and Java, I specialize in building robust client-server applications. I'm adept in SQL, particularly in PostgreSQL and Oracle environments, and proficient in web development (HTML, CSS, JavaScript).

### Experiences

#### ● Software Developer - PT Murni Sadar Tbk

October 2023 - Now

- Experience in designing, developing, maintaining, and deploying healthcare software solutions.
- Proficient in SQL, I excel in data retrieval and query optimization, enhancing system performance and efficiency.
- Migrating systems from monolithic to microservices architecture, improving scalability and efficiency.
- Successfully achieved more than 50% improvement in software speed through strategic optimization efforts.
- Providing data for reports and dashboards, as well as data integration from multiple databases.

### Educations

#### ● Universitas Mikroskil (Informatics Engineering)

2020 - Now

#### ● RevoU (Data & Software Engineering)

2023
